Lahore,
Pakistan.

Dear Hr,

      I am interested in the software engineer position in your esteemed organization. I have recently graduated with 3.4 cgpa in Bachelors in Software Engineering from University of Karachi, UBIT.

During my studies, I have done 2 internships in web application development in MEAN and PHP technologies and have completed live projects maintained in the C.V. I have also learnt how to make 3D models and can develop small size games using Unity 3D. I have also won 3 database design competitions at 3 different university events.
I am always interested in learning new technologies and have ability to work in teams and also individually at any project that I am entrusted with.

I am about to settle in Lahore by the end of January and have found your environment to be best suited to start my career with.
I am confident that my skills and ability to learn vast technologies and work with ease qualifies me for consideration such that your esteemed organization can benefit from my loyalty and dedication to the fullest.

I am looking forward to become a beneficial resource for Conrad Labs.

Best Regards,
Muhammad Hamza Mirza.
